DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed August 18, 2004.

Allowable Subject Matter

2. Claims 1-15 are allowable over prior art.

The following is an examiner's for allowance: Prior art teaches passive RFID tags, which derive their power from the RF energy transmitted from a reader and therefore do not include a battery. Prior art also teaches shielding electrical components on an RFID tag from the interference caused by the antenna. The prior art of record, taken alone, or in combination with any other prior art however, fails to teach or fairly suggest the specific features of claims 1 and 8 of the present claimed invention. Specifically, prior art fails to teach two separate shielding members enclosing various components contained in the communication device. The first shielding member is made of a material that shuts off, reflects, or absorbs radio waves and encloses electric circuits other than the antenna. The second shielding member encloses only the antenna and is made of a material that attenuates radio waves in a predetermined frequency band. Prior art additionally fails to teach another embodiment disclosed in claim 8 of the current invention. Prior art fails to teach the antenna being enclosed by a second shielding member that has an opening formed in a portion thereof facing a front face of the antenna so as to attenuate radio waves in a frequency band corresponding to an area of the opening. Moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Blankenship (2004/0004113), Bartuska et al (5,499,162), Bethurum (5,477,421), Tuttle et al (2001/0007335), Doyle et al (6,595,419), and Wallace et al (6,295,031).
